Sir:

This present application is a national phase application of PCT/GB2005/000930.

The request to enter the national phase was submitted, via express mail number EV
334310486 US on September 15, 2006. The application was tentatively assigned

United States application number 10/593,131. Enclosed as Attachment 1 is a copy of the returned postcard showing the application number of 10/593,131, and date of receipt by the United States receiving branch of September 15, 2006.

The undersigned's paralegal, Gayle Ruckstuhl, has made several telephone inquiries regarding this application to the PCT Help Desk at (571) 272-4300, the most recent telephone inquiry being made on June 1, 2007. In each instance the Help Desk of the PCT Receiving branch has informed Ms. Ruckstuhl that the delay is internal at the PCT Branch and that delays up to 12 to 14 months may be expected.

However, the undersigned has, on several occasions since September 2006, filed other national phase applications. These applications have been addressed by the PCT Branch in far shorter time than 12 to 14 months.

Further, enclosed as Attachment 2 is a copy of a printout from the private PAIR database for this application. As you can see from the enclosure, it appears the "Status" of the application is "Application Undergoing Preexam Processing" with the most recent status date of September 27, 2006. However, when the Transaction History (a copy of which is enclosed as Attachment 3) is viewed, it appears the application has been "Cleared by OIPE CSR" on October 5, 2006.

As one can see from the two enclosures, there is a discrepancy in the last status date, and, it is believed the application should have been issued a notification of missing requirements since the required oath/declaration by the inventors was not included with the original filing on September 15, 2006.

Accordingly, applicant, through applicant's attorney, hereby formally requests that a status letter be issued to the undersigned advising when the expected notification

of missing requirements will be issued by the United States Patent and Trademark Office PCT Branch. Additionally, issuance of the expected notification of missing requirements as quickly as possible is hereby requested.

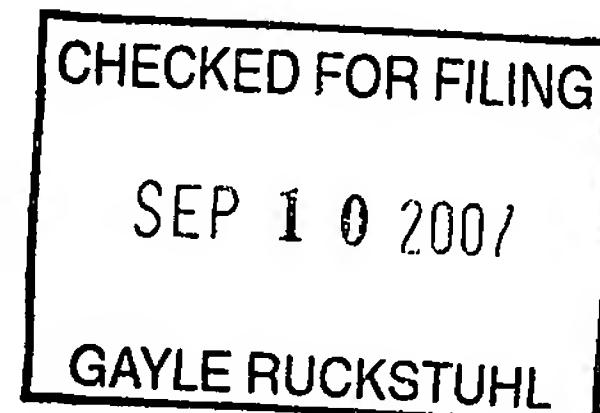

To the extent there is any fee required in connection with the receipt, acceptance and/or consideration of this paper and/or any accompanying papers submitted herewith, please charge all such fees to Deposit Account 50-1943.

Respectfully submitted,

Date: 10 September 2007
